TITLE INDEX

$a \pmod p \leqslant b \pmod p$ for all primes p implies $a = b$, P. P. PÁLFY, P. ERDŐS, AND M. SZEGEDY, 169

Addition theorems in ordinary differential equations, ABRAHAM UNGAR, 872

All the way with Wirtinger: A short proof of Bonnesen's Inequality, LAWRENCE J. WALLEN, 440

An alternative approach to the dimension theorem for inner product spaces, JACK E. GRAVER, 671

An anticommutativity consequence of a ring commutativity theorem of Herstein, D. MACHALE, 162

An application of random walk to a problem in population genetics, HARRY GONSHOR, 668

Applications of a product identity to sums of squares and partitions, CHARLES VANDEN EYNDEN, 652

The arithmetic-geometric mean inequality revisited: Elementary calculus and negative numbers, DONALD P. MINASSIAN, 977

An asymptotic approximation connected with the golden number, R. B. PARIS, 272

Barycentric representation for the incenter and excenters of a triangle, PHILIPPE TONDEUR, 975

Best approximation by convex functions, D. ZWICK, 528

Binomial identities and hypergeometric series, RANJAN ROY, 36

The bisection method: Which root?, ARTHUR BENJAMIN, 861

The classification of 1-manifolds: A take-home exam, DAVID GALE, 170

Combinatorial and functional identities in one-parameter matrices, A. UNGAR AND D. KALMAN, 21

Computing binomial coefficients, P. GOETGHELUCK, 360

A conjecture related to chi-bar-squared distributions, ALEXANDER SHAPIRO, 46

Consequences of the memoryless property for random variables, ROGER B. NELSEN, 981

Constructing a fair border, ANATOLE BECK, 48

The construction of matrices with required properties over the integers, T. M. CRONIN, 656

A counterexample to a conjectured hermitian matrix inequality, TAKAYUKI FURUTA, 271

Counting the subgroups of some finite groups, WILLIAM C. CALHOUN, 54

Curvature, circles, and conformal maps, ALAN F. BEARDON, 48

Defining the sign of a permutation, S. NELSON, 543

Differentiation of power series, R. VÝBORNÝ, 369

The diophantine equation $X^2 + 7 = 2^n$, WELLS JOHNSON, 59

Disjoint covering systems of congruences, R. J. SIMPSON, 865

Duality in nonnormal quartic fields, C. E. VAN DER PLOEG, 279

An elementary proof of $\sum_{n=1}^{\infty} 1/n^2 = \pi^2/6$, BOO RIM CHOE, 662

The error for quadrature methods: A complex variables approach, E. B. SAFF AND JON C. SNADER, 175

Exponential distribution, HERBERT S. WILF, 515

Extreme points of convex sets in infinite dimensional spaces, NINA M. ROY, 409

The fascination of the elementary, P. R. SCOTT, 759

Finite lists of obstructions, HERBERT S. WILF, 267

Fourteen proofs of a result about tiling a rectangle, STAN WAGON, 601

Further problems in partitions, G. E. ANDREWS, 437

Gauss-Jordan reduction: A brief history, STEVEN C. ALTHOEN AND RENATE MCLAUGHLIN, 130

Generalization of some algorithms of Euler, HELAMAN FERGUSON, 647

A generalization of the Goldbach-Shnirel'man theorem, MELVYN B. NATHANSON, 768

The geometric, logarithmic, and arithmetic mean inequality, FRANK BURK, 527

A greeting; and a view of Riemann's hypothesis, HERBERT S. WILF, 3

How electronics ended the Poisson approximation to the binomial distribution, PETER W. ZEHNA, 984

Hyperbolic motions of conics, CLAUDIO M. MENDES AND MARIA A. S. RUAS, 825

An introduction to the Ising model, B. A. CIPRA, 937

An invariant of finite abelian groups, MICHAEL HOFFMAN, 664

The Jordan canonical form: an old proof, RICHARD A. BRUALDI, 257

Limiting distribution for the generalized matching problem, BONG DAE CHOI, 356

$\ln 2 = 1 - \frac{1}{2} + \frac{1}{3} - \frac{1}{4} + \cdots$ (proof by exhaustion), MARK FINKELSTEIN, 541

Mathematics and computer science journal subscriptions in undergraduate libraries, L. A. STEEN, 537

Matrices satisfying $AB - BA = I$, H. HEATHERLY, 979

A matrix with applications to random walk, brownian motion, and ring theory, J. G. MAULDON, 423

The maximum order of an element of a finite symmetric

A greeting; and a view of Riemann's hypothesis, HERBERT S. WILF, 3

How electronics ended the Poisson approximation to the binomial distribution, PETER W. ZEHNA, 984

Hyperbolic motions of conics, CLAUDIO M. MENDES AND MARIA A. S. RUAS, 825

An introduction to the Ising model, B. A. CIPRA, 937

An invariant of finite abelian groups, MICHAEL HOFFMAN, 664

The Jordan canonical form: an old proof, RICHARD A. BRUALDI, 257

Limiting distribution for the generalized matching problem, BONG DAE CHOI, 356

$\ln 2 = 1 - \frac{1}{2} + \frac{1}{3} - \frac{1}{4} + \cdots$ (proof by exhaustion), MARK FINKELSTEIN, 541

Mathematics and computer science journal subscriptions in undergraduate libraries, L. A. STEEN, 537

Matrices satisfying $AB - BA = I$, H. HEATHERLY, 979

A matrix with applications to random walk, brownian motion, and ring theory, J. G. MAULDON, 423

The maximum order of an element of a finite symmetric

group, WILLIAM MILLER, 497
A method of obtaining pythagorean triples, AKIHIRO NISHI, 869
The missing fields, D. G. MEAD, 871
A modern fairy tale?, JOHN POLAND, 291
The monotonicity theorem, Cauchy's interlace theorem, and the Courant-Fischer theorem, YASUHIKO IKEBE, T. INAGAKI, AND S. MIYAMOTO, 352
Monthly unsolved problems, 1969–1987, RICHARD K. GUY, 961
The multiplication theorem for Fredholm operators, DONALD SARASON, 68
Neighborly families of congruent convex polytopes, JOSEPH ZAKS, 151
Note on characteristic polynomials, J. ROVŇÁK, 289
A note on the $3X + 1$ problem, I. KOREC AND Š. ZNÁM, 771
The nth derivative as a limit, J. B. WILKER, 354
The number of three-dimensional convex polyhedra, EDWARD A. BENDER, 7
On computing discriminants, JOHN MCKAY, 523
On the Runge example, JAMES F. EPPERSON, 329
The place of $\ln x$ among the powers of x, HENRY C. FINLAYSON, 450
Playing games with games: the hypergame paradox, WILLIAM S. ZWICKER, 507
Problems in the transition from high school calculus to college calculus, CUPM PANEL, 776
A proof of the reflective property of the parabola, ROBERT C. WILLIAMS, 667
Rational representation of finite groups: The story of γ_7, DENNIS KLETZING, 846
Real division algebras of dimension > 1 contain $\mathbf{C}$, JOHN PETRO, 445
A refraction problem in several variables, NATHANIEL L. SILVER, 545
A remark on finite fields, I. N. HERSTEIN, 290
The remarkable theorem of Lévy and Steinitz, PETER ROSENTHAL, 342
A reordering of the Sylow theorems, MÍCHEÁL O. SEARCÓID, 165
A required reading program for mathematics majors, ROBERT L. BRABENEC, 366
Ringing the cosets, ARTHUR T. WHITE, 721
Romberg integration by Taylor series, EDWARD R. ROZEMA, 284
A rose is a rose..., PETER M. MAURER, 631
Selecting estimators for the standard deviation of a normal distribution, DAVID E. FREUND, 971
A simple characterization of the gamma function, BERND RODEWALD AND DETLEF LAUGWITZ, 534
A simplification of Taylor's theorem, F. BRAUER, 453
Some applications of the bounded convergence theorem for an introductory course in analysis, JONATHAN W. LEWIN, 988
Spaces with locally compact completions are compact, ALFONSO VILLANI, 863
Strings, substrings, and the nearest integer function, HERBERT S. WILF, 855
Sub-Gaussian techniques in proving strong laws of large numbers, T.-C. HU AND R. LEE TAYLOR, 295
A tale of two coins, F. K. HWANG, 121
Trees and Euler tours in a planar graph and its relatives, R. B. RICHTER AND M. E. KIDWELL, 618
The tumbling box, SUSAN JANE COLLEY, 62
A unified treatment of various theorems in elementary analysis, MICHAEL W. BOTSKO, 450
Using commutators to prove A_5 is simple, K. DAVID, 775
Using ringers in teaching modern algebra, J. J. MALONE, 773
The way of all means, P. B. BORWEIN AND J. M. BORWEIN, 519
What is several complex variables?, S. G. KRANTZ, 236
When is a free union of regular measures regular?, LUZVIMINDA VILLAR AND GERALD BEER, 443

SUBJECT INDEX

This index uses the 1985 revision of the AMS's 1980 Mathematics Subject Classification.

00-XX GENERAL

–01 Elementary exposition, textbooks R. C. WILLIAMS 667
A05 General mathematics J. POLAND 291 P. R. SCOTT 759

05-XX COMBINATORICS

A19 Classical combinatorial problems: Combinatorial identities R. ROY 36
A99 Classical combinatorial problems: Miscellaneous topics F. K. HWANG 121
B45 Designs and configurations: Tessellation and tiling problems S. WAGON 601
C30 Graph theory: Enumeration of graphs and maps E. A. BENDER 7

11-XX NUMBER THEORY

A51 Elementary number theory: Factorization; primality P. GOETGHELUCK 360 P. ERDŐS, P. P. PÁLFY, AND M. SZEGEDY 169
A99 Elementary number theory: Miscellaneous topics B. R. CHOE 662 I. KOREC AND Š. ZNÁM 771 A. NISHI 869
D41 Diophantine equations: Higher degree equations W. JOHNSON 59
P32 Additive number theory: Goldbach-type theorems M. B. NATHANSON 768
P68 Additive number theory: Partitions: restricted by congruence, inequality or repetition conditions C. VANDEN EYNDEN 652

12-XX ALGEBRAIC NUMBER THEORY, FIELD THEORY AND POLYNOMIALS

–01 Elementary exposition, textbooks I. N. HERSTEIN 290
A50 Algebraic number theory: global fields: Class number, discriminant J. MCKAY 523
A55 Algebraic number theory: global fields: Galois theory C. E. VAN DER PLOEG 279
F05 Field extensions: Algebraic extensions D. G. MEAD 871

15-XX LINEAR AND MULTILINEAR ALGEBRA; MATRIX THEORY

–01 Elementary exposition, textbooks J. E. GRAVER 671

A15 Determinants, permanents, other special matrix functions J. Rovnyak 289
A18 Eigenvalues, singular values, eigenvectors Y. Ikebe, T. Inagaki, and S. Miyamoto 352
A21 Canonical forms, reductions, classification R. A. Brualdi 257
A24 Matrix equations and identities D. Kalman and A. Ungar 21 H. Heatherly 979
A36 Matrices of integers T. M. Cronin 656
A48 Positive matrices and their generalizations H. Ferguson 647

16-XX ASSOCIATIVE RINGS AND ALGEBRAS

A76 Near-rings J. J. Malone 773 D. MacHale 162

17-XX NONASSOCIATIVE RINGS AND ALGEBRAS

A35 General nonassociative rings: Division algebras J. Petro 445

20-XX GROUP THEORY AND GENERALIZATIONS

–01 Elementary exposition, textbooks K. David 775
B05 Permutation groups: General theory for finite groups S. Nelson 543
D20 Abstract finite groups: Sylow subgroups, Sylow properties, π-groups, π-structures M. O. Searcóid 165
D99 Abstract finite groups: Miscellaneous topics W. C. Calhoun 54 M. Hoffman 664

26-XX REAL FUNCTIONS

–01 Elementary exposition, textbooks N. L. Silver 545
A06 Functions of one variable: One-variable calculus M. W. Botsko 450 F. Brauer 453 D. P. Minassian 977
A09 Functions of one variable: Elementary functions H. C. Finlayson 450
A24 Functions of one variable: Differentiation: general theory, generalized derivatives, mean-value theorems J. B. Wilker 354
A42 Functions of one variable: Integrals of Riemann, Stieltjes, and Lebesgue type J. W. Lewin 988
D99 Inequalities: Miscellaneous topics F. Burk 527

28-XX MEASURE AND INTEGRATION

A12 Classical measure theory: Contents, measures, outer measures, capacities G. Beer and L. Villar 443

30-XX FUNCTIONS OF A COMPLEX VARIABLE

A10 General properties: Inequalities in the complex domain R. Výborný 369
C20 Geometric function theory: Conformal mappings of special domains A. F. Beardon 48

32-XX SEVERAL COMPLEX VARIABLES AND ANALYTIC SPACES

–01 Elementary exposition, textbooks S. G. Krantz 236

33-XX SPECIAL FUNCTIONS

A15 Gamma and beta functions D. Laugwitz and B. Rodewald 534

34-XX ORDINARY DIFFERENTIAL EQUATIONS

–01 Elementary exposition, textbooks A. Ungar 872

40-XX SEQUENCES, SERIES, SUMMABILITY

–01 Elementary exposition, textbooks M. Finkelstein 541

41-XX APPROXIMATIONS AND EXPANSIONS

–01 Elementary exposition, textbooks D. Zwick 528
A25 Rate of convergence, degree of approximation R. B. Paris 272

47-XX OPERATOR THEORY

–01 Elementary exposition, textbooks N. M. Roy 409
A53 Single linear operators: general theory: Fredholm operators D. Sarason 68
B15 Single linear operators: special classes of operators: Hermitian and normal operators T. Furuta 271

51-XX GEOMETRY

–01 Elementary exposition, textbooks R. C. Williams 667
M20 Real and complex geometry: Polyhedra and polytopes; regular figures, division of spaces P. Tondeur 975

52-XX CONVEX SETS AND RELATED GEOMETRIC TOPICS

–01 Elementary exposition, textbooks N. M. Roy 409
A40 Inequalities and extremum problems L. J. Wallen 440

54-XX GENERAL TOPOLOGY

–01 Elementary exposition, textbooks A. Beck 157
D30 Fairly general properties: Compact spaces and generalizations A. Villani 865

57-XX MANIFOLDS AND CELL COMPLEXES

–01 Elementary exposition, textbooks D. Gale 170

60-XX PROBABILITY THEORY AND STOCHASTIC PROCESSES

F15 Limit theorems: Strong theorems T.-C. HU AND R. L. TAYLOR 295
J15 Markov processes: Random walk H. GONSHOR 668 J. G. MAULDON 423

62-XX STATISTICS

-01 Elementary exposition, textbooks P. W. ZEHNA 984
E10 Distribution theory: Characterization and structure theory R. B. NELSEN 981
E20 Distribution theory: Asymptotic distribution theory B. D. CHOI 356
E99 Distribution theory: Miscellaneous topics D. E. FREUND 971
H10 Multivariate analysis: Distribution of statistics A. SHAPIRO 46

65-XX NUMERICAL ANALYSIS

D05 Numerical approximation: Interpolation J. F. EPPERSON 329
D30 Numerical approximation: Numerical integration E. R. ROZEMA 284
D32 Numerical approximation: Quadrature and cubature formulas E. B. SAFF AND J. C. SNADER 175
H05 Nonlinear algebraic or transcendental equations: Single equations A. BENJAMIN 861

70-XX MECHANICS OF PARTICLES AND SYSTEMS

B10 Kinematics: Kinematics of a rigid body S. J. COLLEY 62

98-XX MATHEMATICAL EDUCATION, COLLEGIATE

A20 Curriculum development: Calculus and analysis CUPM PANEL 776
D05 Enrichment R. L. BRABENEC 366 L. A. STEEN 537

INDEX OF SPECIAL RECURRING TOPICS

Award for Distinguished Service to Prof. Gail S. Young 234

The William Lowell Putnam Mathematical Competition 747

SOLUTIONS

Numbers in boldface refer to problems; those in lightface to pages.

REVIEWS

Names of authors are in ordinary type; those of reviewers in capitals.

TITLES

A First Course in Mathematical Foundations of Thermodynamics, David R. Owen, R. ARIS 562–564
Abstract Algebra, I. N. Herstein, G. BENKART 804–806
An Introduction to Discrete Mathematics, Steven Roman, C. F. KELEMEN 564–567
Blaschke Products: Bounded Analytic Functions, Peter Colwell, W. RUDIN 311–314
Curves and Singularities: A Geometric Introduction to Singularity Theory, J. W. Bruce and P. J. Giblin, J. CALLAHAN 205–210
Differential Equations, A. B. Vasil'eva, A. N. Tikhonov, and A. G. Sveshnikov, W. S. LOUD 308–310
Differential Equations with Linear Algebra, Martin M. Guterman and Zbigniew H. Nitecki, F. HOWES 1022–1024
Discrete Mathematics, Richard Johnsonbaugh, C. F. KELEMEN 564–567
Fundamentals of Differential Equations, R. Kent Nagle and Edward B. Saff, F. HOWES 1022–1024
General Topology, Jacques Dixmier, R. F. BROWN 475–479
General Topology and Homotopy, I. M. James, R. F. BROWN 475–479
Groups and Geometry, Roger C. Lyndon, T. W. TUCKER 392–394
Groups: A Path to Geometry, R. P. Burn, M. SENECHAL 567–570
I Want to be a Mathematician: An Automathography, Paul R. Halmos, G. ROTA 700–702
Introduction to Differential Equations, Richard K. Miller, F. HOWES 1022–1024
Introduction to Differential Equations with Applications, Fred Brauer and John A. Nohel, F. HOWES 1022–1024
Introductory Graph Theory, Gary Chartrand, P. A. CATLIN 483–485
Mathematical Surveys: Bieberbach Conjecture, Bearnstein et. al. (eds), E. A. MERKES 893–895
Mathematics and the Search for Knowledge, Morris Kline, R. HERSH 314–315
Numerical Recipes, W. H. Press, B. P. Flannery, S. A. Teukolsky, and W. T. Vetterling, L. F. SHAMPINE 889–892
Ordinary Differential Equations, Harry Pollard and Morris Tenenbaum, F. HOWES 1022–1024
Random Walks and Electric Networks, J. Laurie Snell and Peter G. Doyle, K. B. STOLARSKY 202–205
Rational Thermodynamics, C. Truesdell, R. ARIS 562–64
Real Linear Algebra, Antal E. Fekete, S. C. GELLER 86–8
Results and Problems in Combinatorial Geometry, Gohberg and Boltjansky, M. BREEN 391–392
Statistical Inference, Vijay K. Rohatgi, B. W. BRUNSON 210–215
Superior Beings: If They Exist, How Would We Know?, Steven J. Brams, W. F. LUCAS 92–95
The Banach-Tarski Paradox, Stan Wagon, J. MYCIELSKI 698–700
The Beauty of Doing Mathematics, Serge Lang, P. R. HALMOS 88–92
The Chip with the College Education: the HP-28C, Hewlett-Packard, Y. NIEVERGELT 895–902
The Fascination of Statistics, Richard J. Brooks et. al., J. GANI 806–809
Topology, Klaus Janich, R. F. BROWN 475–479
Why Math?, R. P. Driver, U. DUDLEY 479–483

AUTHORS

Bearnstein et. al. (eds), Mathematical Surveys: Bieberbach Conjecture, E. A. MERKES 893–895
